The diagram illustrates a 64-bit bus structure, divided into four 16-bit segments. Each segment is represented by a horizontal bar with a label '16' at its right end. The segments are connected by a vertical line on the left, labeled '64' at the top. Below each 16-bit segment, there are three horizontal lines representing data paths. The first segment has a '3' below it, the second a '3', the third a '1', and the fourth a '1'. The bus is labeled '0-0-0' at the top right, indicating a specific state or configuration.
